Mineola, N. Y - Pl 7-3900

WHAT THIS CATALOG MEANS TO YOU

For the first time in the history of our industry an attempt is made to eliminate the confusion and difficulties in obtaining exact knob replacements. In this catalog we have a nomenclature system that we propose as an industry standard; it cuts through the multitudes of model and part numbers; and lends itself to ready identification of the knob, its function, and identification of the original equipment manufacturer (OEM) of the TV set.

WHAT TO DO IF YOU DON'T KNOW THE NUMBER

If you cannot find the model number in this catalog, first determine the make of TV set and then select the appropriate knob from the illustrations.

Care must be taken to note the position of the "flat" or indexing tabs in the shaft opening of the channel selector. Differences in hub construction which do not affect dimensions of the shaft opening can be ignored. The hub on many TVD Exact Replacement Knobs has been redesigned to provide better service and longer life. Knobs having the same TVD number but different suffix letters are essentially the same except for color or trim and in most cases are interchangeable.
